

Switch to a Powerful New CDN Ahead of Holiday Shopping Season

Discover How Milliseconds Can Make Holiday Sales Soar

WHITE PAPER

Maximize Your Holiday Profits in 2023

OVERVIEW

The holiday season is a critical time for your business. Whether you operate online or physical stores, run an e-commerce company, or offer streaming entertainment and educational services, the holiday season presents a massive opportunity for increased revenue. It's when customers are actively seeking products, services, and entertainment to celebrate with their loved ones. To make the most of this opportunity, you need to ensure your digital platforms are ready to handle the surge in traffic and deliver a seamless experience to your customers.

WHY SPEED MATTERS

One of the key factors that can significantly impact your holiday season profits is website speed. Slow-loading websites frustrate your customers, leading to higher bounce rates and lost sales opportunities. A powerful Content Delivery Network (CDN) manages your online traffic to ensure it reaches your customers quickly, no matter where they are located.

THE POWER OF A CDN

By deploying a high-performance CDN, you will supercharge your website's loading times, resulting in a smoother user experience. Faster load times not only make your customers happier but also boost your chances of converting more visitors into paying customers. With the right CDN in place, your online and physical retail stores can handle increased website traffic during the holiday rush with ease.

WHAT YOU NEED TO KNOW:

- Your website's speed and throughput directly impacts your bottom line.
- A CDN optimized for speed helps shoppers quickly discover and buy faster.
- Milliseconds matter for monetization. Discover hard data of how each second delay could be impacting your sales.

BENEFITS OF IMPLEMENTING A CDN IN TIME FOR THE HOLIDAYS

Higher Conversion Rates

By investing in a high-performance CDN like CacheFly, you can boost your conversion rates and capitalize on the increased holiday traffic. This means more visitors converting into paying customers, helping you maximize your profits and achieve your business goals.

Mobile Speed Also Matters

In today's fast-paced world, many of your customers are on the go, accessing your website from their mobile devices. Whether they're shopping, streaming movies or music, or looking for educational materials, their mobile experience matters. Slow-loading mobile websites can be a major turn-off and may drive potential customers away.

IMPROVING CONVERSIONS WITH A CDN

As an online or physical retailer, an e-commerce company, or an organization offering digital downloads, conversions are the lifeblood of your business. You want your visitors to turn into loyal customers, and that's where CacheFly's CDN can make a significant impact.

SEE PROVEN RESULTS

Google's benchmarking data reveals that websites with faster loading times experience higher conversion rates.

- According to [a study by Bidnamic US](#), for every second a site loads faster, the conversion rate improves by 17%.
- [Google's Industry Mobile Speed report](#) found that a page load time on mobile of 10 seconds increases the bounce rate by 123% when compared to a one-second loading speed.
- [Google Consumer Insights](#) reports that 53% of mobile site visitors will leave a page if it takes more than three seconds to load.

A faster website powered by CacheFly CDN can reduce bounce rates and encourage more visitors to take that crucial next step - making a purchase or downloading valuable content.

ATTRACT CAPTIVATED AUDIENCES

If your organization offers streaming entertainment or educational services, providing a flawless user experience is paramount. Here's why it matters:

- [Google's Consumer Insights](#) report emphasizes the dominance of video streaming in the digital landscape. By leveraging CacheFly CDN, you can deliver uninterrupted, buffer-free experiences, keeping your viewers engaged and coming back for more.
- This [Unbounce survey](#) underscores the importance of page speed for video conversions. CacheFly CDN ensures that your videos and educational content load quickly and smoothly, captivating your audience. Foster greater engagement, higher completion rates, and ultimately, turn more satisfied holiday viewers into loyal subscribers.

GET MORE MOBILE CONVERSIONS

The holidays typically see a significant surge in mobile shopping, with 47% of shoppers using smartphones for their purchases. As mobile usage continues to soar, it's essential to optimize your mobile website for speed and efficiency. Google's [Industry Mobile Speed report](#) emphasizes the critical role of fast-loading mobile sites in capturing customer interest.

Meet the demands of mobile users by ensuring your mobile platform is optimized for speed, convenience, and ultimately, higher mobile conversion rates.

TIME IS MONEY, TRULY.

If 1,000 people visit your website to buy a \$50 product, this could illustrate the difference in your potential earnings:

- A 1 second page load time at a 3.05% conversion rate results in \$1,525
- A 2 second page load time at a 1.68% conversion rate results in \$840
- A 3 second page load time at a 1.12% conversion rate results in \$560
- A 4 second page load time at a 2.93% conversion rate results in \$335
- In the span of ~4 seconds, potential sales have dropped by just over \$1,190.

Multiply that across more visitors to your website looking at potentially higher-priced products and services, and it results in significant gaps in potential revenue.

The CacheFly Difference

CacheFly CDN can be a game-changer for your business, whether you're in e-commerce, streaming entertainment, or educational services. The improvements in conversion rates and user experiences can take your company's success to new heights. Embrace the power of CacheFly CDN and watch as your business flourishes during the festive season and beyond. It's not just about video and text, either. CacheFly delivers state-of-the-art image optimization too.

Introducing Smart Image Optimization for Enhanced Speed

For online and physical retailers, e-commerce companies, streaming entertainment, and educational organizations with image-heavy websites, image optimization is crucial. CacheFly is here to supercharge your website's performance by optimizing your images

The Benefits of Smart Image Optimization - Faster Loading, Happier Customers

CacheFly's image optimization feature is designed to reduce image load times significantly. By compressing images without sacrificing quality, it ensures that your website's visual content loads swiftly and impresses your visitors from the moment they arrive.

From improved loading times to increased user engagement, CacheFly has been a game-changer for businesses across various industries.

Don't Just Take Our Word for It!

When it comes to choosing a CDN, you want to be confident that you're making the right decision. CacheFly has been leading the pack for an impressive 20 years, delivering top-notch performance that sets it apart from the competition. Multiple sources can confirm these claims, for example:

Caching Performance Data from [CDNPerf](#) and [Cedexis](#): Proven Excellence

CDNPerf, a reliable performance monitoring platform, consistently ranks CacheFly as the fastest CDN. The data speaks for itself, showing that CacheFly's speed and efficiency have been unmatched for two decades.

Customer Testimonials - Real Users, Real Results

Hear from satisfied customers who have experienced the power of CacheFly firsthand. Their testimonials highlight CacheFly's consistent speed, reliability, and the positive impact it has had on their businesses.

THE FUTURE IS FA-A-A-ST

CacheFly's platform is recognized as the fastest CDN for the past 20 years. The solution ensures users have a smooth and speedy experience, catering to the needs of on-the-go visitors, attracting more traffic, and increasing engagement. With a seamless customer experience, you can tap into the growing trends of mobile and online shopping during the holidays and beyond.
